

Queen Lab (Bees)

Herrick Archives Building 336

A. IDENTIFICATION & LOCATION

1. Name

1.1 Never officially named by Board of Trustees action.

1.2 Alternate names noted:

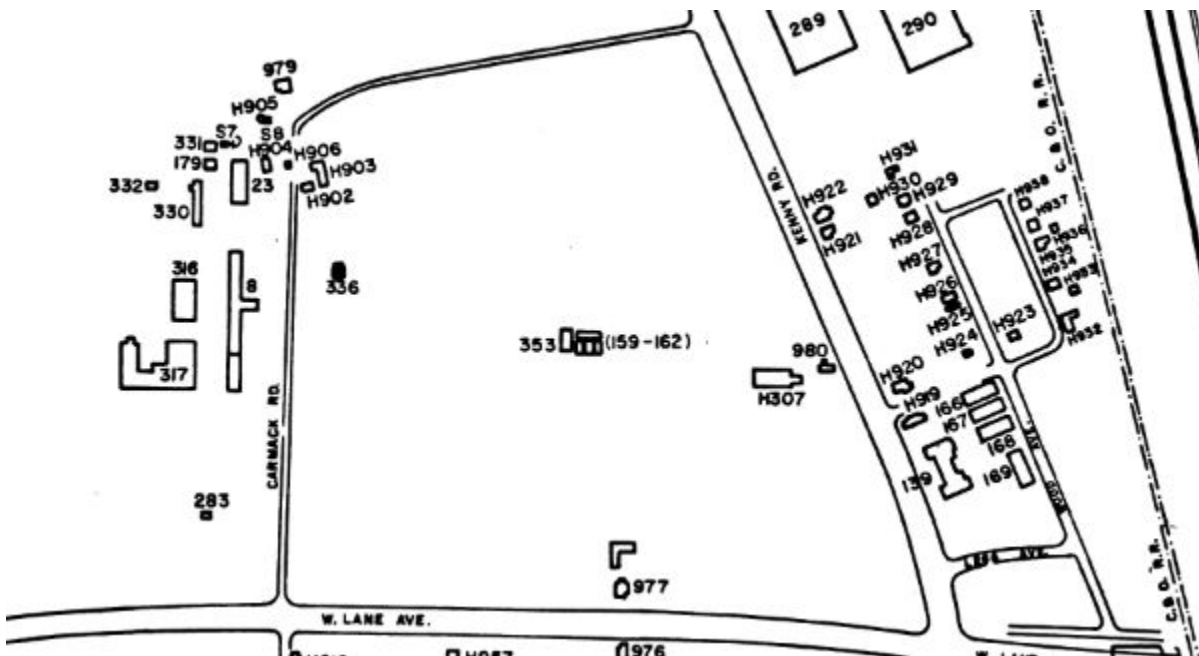

Bee Lab

Bee Insemination Lab

2. Location

2.1 Located at 2456 Carmack Road (address arbitrarily assigned for indexing purposes). See map below.

2.2 For greater detail, see Sheet 39 in the book of campus maps in the University Archives.

For identification of other buildings shown, see Appendix A.

3. General Description

3.1 Type of construction:

A one-story frame building approximately 17' x 25'.

B. PLANNING & CONSTRUCTION

Associate Professor Emeritus Winston E. Dunham, who used this building for entomological studies with bees, states that this building was erected by the College of Agriculture for his use, but he does not recall the date.

The building does not appear on a June 15, 1938 aerial survey, but does show on October 25, 1946 aerial photograph. This sets the date of construction between these two dates.

Professor Evan K. Alban, of the Department of Horticulture, is certain that the building was at its present location when he came to the University in 1942, and was located there to provide bees for pollination of the apple orchard to the east. If his recollection is correct, the building was erected between the June 15, 1938 aerial survey and 1942.
